STRAWBERRIES

Big rooted plants. Why not plant a good bed this spring. All the following are perfect flowering varieties, that is, you need not plant other varieties with them. Perfect flowering varieties will produce a perfect crop when planted

alone. They do not need other varieties to fertilize their bloom. Plant strawberry plants for garden purposes in rows 2 feet apart and the plants one foot apart in the rows. For commercial fields plant in rows three feet apart and the plants 18 inches apart in the row, 9,670 plants are required per acre.

Parcel Post Rates on Strawberry Plants: Add 10c per hundred, or 8c for smaller quantities if your order is below \$2.50.

AMBROSIA—This variety is considered to be one of the largest late berries ever introduced. Ripens a month later than Premier. Very handy, produces large, vigorous plants, which often grow 18 inches tall; rigid fruit stems often grow 6 to 8 inches tall, which keeps the berries off the ground, which means clean fruit. Delicious sweet flavor. Firm flesh and skin. Matures every berry to full size.

25 for \$1.00; 50 for \$1.75
100 for \$3.00; 200 for \$5.50

BLACKMORE STRAWBERRIES—Great strawberry both for the market and the home. Immense crops of large, firm berries of clear red, flavor rich and sweet. Splendid for canning. Entirely hardy. Perfect flowering.

25 for \$0.90; 50 for \$1.50
100 for \$2.50; 200 for \$4.50

BLACK STRAWBERRY—Here is a berry which is unique as to coloring and very distinctive as to flavor. Its color is such a deep red that it appears black. Berries are large, nearly round, and of finest quality. Flavor sweet and delicious. Ripens midseason, an excellent canning variety and very productive. Perfect flowering.

25 for \$0.95; 50 for \$1.60
100 for \$2.75; 200 for \$5.00

CATSKILL STRAWBERRY—Very best late strawberry ripening after Dunlap. Big, bright red berries,

firm and of exceptionally fine flavor or are produced in abundance on tall strong plants. We recommend it highly. Perfect flowering.

25 for \$0.95 50 for \$1.60
100 for \$2.75; 200 for \$5.00

JEWELL—Here is a variety which has been tested in almost every section of the U. S. Has made a wonderful showing, berries are large, firm, highly flavored. Has a long fruiting season. Giant delicious berries for several weeks. The plants vigorous, very productive. We highly recommend Jewell. Perfect flowering.

25c for \$0.90; 50 for \$1.50
100 for \$2.50 200 for \$4.50

LATE GIANT—The Latest of the Late. A new variety. Doesn't begin to blossom until other varieties are fruiting—so late in fact that there is no waiting between strawberries and raspberries. Berries are dark red all the way through, are honey-sweet and have the flavor of a wild strawberry. A giant in size. Will make a good fruiting row on any soil and yield a big crop of from 300 to 500 crates per acre. Perfect flowering.

25c for \$0.95; 50 for \$1.60
100 for \$2.75; 200 for \$5.00

GIANT MASTODON EVERBEARING STRAWBERRY—Fresh, Delicious Berries All Season Long—and still the most widely planted of the Everbearers. Starts bearing

three months after planting. Producing a fine crop this fall, then next year bears from June on. Immense berries of bright red full of sweet rich flavor; heavy producer. Perfect flowering.

25 for \$1.75; 50 for \$3.00;
100 for \$5.00.

PREMIER STRAWBERRY—Finest of the early berries. Large, glossy red fruit, firm, splendid quality and flavor. Heavy cropper and so dependable, making good on any soil. Be sure to include some Premier

for their early delicious berries. Perfect flowering.

25 for \$0.95; 50 for \$1.60
100 for \$2.75; 200 for \$5.00

SEN. DUNLAP STRAWBERRY—A century or more old and still the favorite. It never fails to yield yearly those big, rich red berries of delicious flavor, and great quantities of them. Hardy everywhere. Perfect flowering.

ASPARAGUS

The most delicious and most healthful vegetable in the world. Easy to grow. Highly profitable, asparagus has paid as much as \$800.00 to \$1,000.00 per acre in a single season. Once Planted is good for 20 years or more.

HOW TO GROW ASPARAGUS — Plant in rows 2 feet apart, and 1 foot apart in the row for garden purposes. For field or commercial culture plant in rows 4 feet apart and one foot apart in rows. Dig a trench the width and depth of a spade. Spread out the roots. The crown or top of the roots then should be covered with 3 inches of dirt. As the new stalks burst through the soil more dirt should be added until the entire trench is filled.

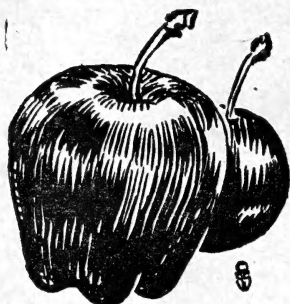

MARY WASHINGTON—Absolutely the best asparagus ever grown. Produces big crops of big, tender, juicy stalks the first spring after planted. This variety will produce big delicious stalks for 20 years or more. It is a pedigreed strain, bred to resist rust, the only rust proof variety. The stalks are thick and heavy, of a beautiful dark green color, very tender, and fine flavored. The most profitable commercial variety in the world.

A Peach to Every Taste and Purpose.

Very few fruits enjoy such a general popularity as do peaches. They combine delicious flavor, attractive appearance, and health giving food value. For many years it has been the popular opinion that peaches would thrive in only certain sections of the country. We know better now. It has been shown that this fruit can be grown at a good profit in every state in the Union. Peaches can be grown on any soil that will produce the average yield of farm crops. Peaches do well in the back yard and furnish as much shade and are equally as attractive as the ordinary ornamental tree.

Listed on these pages you will find all the most profitable varieties of peaches now grown for home and commercial purposes. Peach trees should be planted 16 feet apart each way.

PLUM TREES

Easy to Grow — Bear Delicious Fruit in 2 Years.

Our Thoroughly Tested Varieties Thrive Any Place in the United States.

Few people realize how easy it is to grow luscious plums. All summer long from June to September you can depend on our select varieties of plums for loads of juicy tempting fruit, delicious for contrast eating. And you can fill your pantry shelves with plum butter, wine red jelly and delicious preserves. Highly colored plums are ideal for canning. Plum trees are quick growing, early maturing, free from disease and very profitable bearers. Fancy plums always sell for big prices on the market. Plant a plum tree this spring and gather delicious highly colored fruit next summer. Plum trees are very ornamental, there is nothing more attractive than a plum tree in blossom and when the branches are bending with highly colored fruit nothing could be more magnificent.

Plant Plums 15 feet apart each way for commercial orchards. In dooryards and gardens where space is limited Plums can be set 10 feet apart each way if pruned annually.
